

PRIME MINISTER

ITN REMOTE CAMERA

During your visit to Hendon Town Hall tonight the ITN technical crew will instal the remote camera between the two front seats of your car.

When you leave the Town Hall the camera will be "live" but a black cloth over the camera lens will prevent a picture being relayed back to the studios. When you decide you are ready to be filmed Superintendent Cawthorne will remove the cloth for about 2 minutes. A similar arrangement will apply during your drive to Central Office.

Since you have decided not to go to the Palace I will arrange for the camera to be removed from your car as soon as possible.
