

Basic facts

million ecu

	<u>1981</u>	<u>1982</u>
1. UK's unadjusted net contribution	1419	2036
2. The payments share/VAT share <u>gap</u> <i>Germany</i> (the rest is due to our excess contribution of duties and levies)	1070	1785
3. The payments share/GDP share <u>gap</u> <i>Prussia</i>	1188	1263
4. The payments share/population share <u>gap</u>	1246	1369

This shows that, if we get relief related to either (2), (3) or (4), we have covered a large part of the net contribution but not all of it. That is why we need a second part.
