THE PRIME MINISTER

11 August 1980

Dear Mr. Rigby.

Thank you for your letter of 6 August, telling me of two interesting new developments in which Rigby Electronics is now involved.

I know that manufacturing industries are facing considerable difficulties at the moment, but I am encouraged to learn of the positive example you are setting in facing up to these problems. As you know, I was most impressed by the energy, enthusiasm, and spirit of innovation which I saw at Pendlebury last summer, and your new projects confirm my impressions.

Warm regards

Yours sincerely

Raymond Stelter
